

Danilov & Partners leads Russian ICO legal advisor league tables with its second position by deal number

Russia is the second largest country on ICO deal volume (according to EY). In February 2018, Legal Insight Magazine conducted a survey amongst 400 law firms based in Russia to find out:

- which requests for legal advice related to blockchain and cryptocurrency clients address to law firms in Russia;
- which ICOs were successfully completed in the past 12 months and which firms advised on them;
- the risks and trends in the regulation of ICOs and cryptocurrency in Russia and abroad.

We are pleased to announce that Danilov & Partners leads Russian ICO legal advisor league tables with its second position by deal number, according to the results of the research conducted by Legal Insight.

In addition to the research results, Legal Insight published articles on the subject, including Danilov & Partners article on SAFT (Simple Agreement for Future Tokens) and escrow mechanism for improving ICO credibility and investor protection.
