

Danilov & Partners ranked by Chambers and Partners Europe 2019 in Energy and Natural Resources sector

On 7th March 2019, a reputable international legal guide Chambers and Partners Europe published the results of the Russian legal market research. Danilov & Partners is listed in Energy & Natural Resources sector again proving to be one of the Russian market leaders in this area.

Among the recent largest projects we would like to highlight advising a large Russian private oil company on a US\$2.3bn gas project at Yarakinskoe oil and gas condensate field, including its cooperation with Toyo Engineering Corporation (Japan) on the construction of an ethylene plant; and one of the largest international oil and gas service companies on the sale of its operational assets to a Russian state-owned energy company.

In addition to Chambers and Partners, the firm and its lawyers are recommended by The Legal 500, Best Lawyers and IFLR1000.

We would like to thank our clients for the interesting projects and our team for the brilliant work done!
